TURNING IDEAS INTO ENERGY

industrial, commercial and residential CATEGORIES

The objective in these categories is to acknowledge and reward the proven application of sound energy efficiency principles in the industrial, commercial and residential sectors.

If you've been reducing costs through a more efficient use of energy, we'd like to know how. Show us how you've found a better way to use energy and have been benefiting from it for at least 12 months. If we like your ideas, activities and results, you could win R30 000 for the winning project or R5 000 as the runner-up.

WHO CAN ENTER?

The system, design or product entered must be applied in the industrial, commercial, agricultural or residential end-use market. Entries may comprise of a system or product, or even a proven prototype. The entrant can be an individual, company or registered energy services company responsible for the design, planning, implementation or monitoring of the process or product.

JUDGING CRITERIA

We're looking for a programme, system, design or product that has:

- The potential to be a case study of a best practice application
- Proven (measured) energy and/or cost reductions
- Potential for replication in the rest of the industry
- A high degree of difficulty and complexity
- Creative application of energy efficiency products, systems or programmes
- Led to a reduction in pollution and environmental impacts at the micro and/or macro level

And if applicable:

- Improved product quality
- Increased product throughput
- Improved working conditions

COMPLETING THE ENTRY FORM

This year we are simplifying the entry process. Please complete the entry form and attach a one-page summary of the programme, system, design or product that you have implemented, with high-level performance/savings achieved. The summary should not exceed one page and may contain basic illustrations or graphics. All entry material should also be legible when photocopied.

The panel of judges will consider these summaries in the first round of judging. The entrants of those projects deemed to be of a high calibre will be invited to make detailed presentations at a second judging session. These presentations should then address all the above judging criteria.

The panel of judges and the organisers of the eta Awards undertake to handle all entries in the strictest of confidence and not to disclose any information on entries to any other party. However, it is hoped that the winners in each category will be willing to share general information about their design or programme – especially the results they achieved and the benefits they derived with others, in an effort to catalyse greater energy efficiency in South Africa.

ENTRY FORM - CLOSING DATE: 14 AUGUST 2009

TURNING IDEAS INTO ENERGY

innovation CATEGORY

The objective in this category is to acknowledge and reward innovation in energy efficiency, technology and process application and new idea generation.

If you or your team has a radical concept that will result in a better or a more effective and efficient way to use energy, bringing about new and vibrant opportunities, we want to see it. Your idea could win you R30 000 or R5 000 as a runner-up.

WHO CAN ENTER?

The innovation or development of a system, design or product entered must be suitable for application in any sector including the mining, industrial, commercial, agricultural or residential end-use markets. Entries may comprise of a system, product or prototype. The entrant can be the person or team responsible for the design, planning, implementation or monitoring of the process or product, typical companies or entities such as developers of equipment used in the industrial sector; or companies such as smelters, manufacturers, etc. Typically students and academics could also enter prototypes.

JUDGING CRITERIA

We're looking for a programme, design or product that has:

- **The potential to be a case study of a best practice application and can demonstrate a high degree of energy savings with substantive results**
- **Potential for replication in the rest of the industry**
- **A high degree of difficulty and complexity**
- **Led to a reduction in pollution and environmental impacts at the micro and/or macro level**
- **Creative application of energy efficiency products, systems or programmes**

COMPLETING THE ENTRY FORM

Please complete the entry form and attach a brief summary of the programme, system, design or product that you have designed or a very creative idea that will promote energy efficiency. The summary should not exceed one page and may contain basic illustrations or graphics. All entry material should be legible when photocopied.

The panel of judges will consider these summaries in the first round of judging. The entrants of those projects deemed to be of a high calibre will be invited to make detailed presentations at a second judging session. These presentations should then address all the above judging criteria.

The panel of judges and the organisers of the *eta* Awards undertake to handle all entries in the strictest of confidence and not to disclose any information on entries to any other party. However, it is hoped that the winners in each category will be willing to share general information about their design or programme – especially the results they achieved and the benefits they derived – with others in an effort to catalyse greater energy efficiency in South Africa.

TURNING IDEAS INTO ENERGY

*eta*AWARDS

power fitness CATEGORY

The objective in this category is to acknowledge and reward communication managers who have implemented extensive energy efficiency programmes for their staff.

Your programme could win you R30 000 or R5 000 as a runner-up.

Large corporates have been selected as they create a platform through which a large number of individual homeowners who consume energy, can be and are reached. This programme targets the communication managers of these organisations, who are tasked with using this established platform to communicate with employees.

WHO CAN ENTER

Communication managers of corporates that have:

- **Successfully installed/retrofitted their buildings with energy efficient technology**
And/or:
- **Successfully participated in the Eskom CFL exchange initiative**
- **Successfully implemented an internal communication programme around energy efficiency**

JUDGING CRITERIA

The judging criteria for selecting winners will comprise the following:

Energy efficiency communication strategies implemented by the company during 2008/9 in terms of:

- **Accuracy of content**
- **Tenacity in driving the message to achieve results**
- **Understanding and contextualisation of the energy situation in South Africa**

AWARD ENTRY

Communication managers are to submit a communication case study that outlines how they have effectively achieved the above criteria.

Case study to include the following:

- **Opportunity**
- **Audience description**
- **Desired outcome**
- **Implementation and challenges**
- **Measurement/Evaluation of outcomes**

Measurements are those that companies themselves use to evaluate levels of awareness and understanding of messaging amongst their employees.

Please complete the entry form and attach a one-page summary of the campaign as above. All entry material should also be legible when photocopied.

The panel of judges will consider these summaries in the first round of judging. The entrants of those projects deemed to be of a high calibre will be invited to make detailed presentations at a second judging session. These presentations should then address all the above judging criteria.

The panel of judges and the organisers of the *eta* Awards undertake to handle all entries in the strictest of confidence and not to disclose any information on entries to any other party. However, it is hoped that the winners in each category will be willing to share general information about their design or programme – especially the results they achieved and the benefits they derived – with others in an effort to catalyse greater energy efficiency in South Africa.

TURNING IDEAS INTO ENERGY

women in industry CATEGORY

This category acknowledges and rewards women who have made a large impact or contribution to the energy sector during the last two years.

Your project or programme could win you R30 000 or R5 000 as a runner-up.

WHO CAN ENTER?

Entries are invited from or on behalf of women who have made a large impact on or contribution to the energy sector during the last two years.

JUDGING CRITERIA

We're looking for women who have:

- Made a major impact in the energy sector
- Spearheaded a project with potential for replication in the rest of the industry
- Initiated and directed a project with a demonstrable impact
- Shown outstanding innovation and achievement in the development and implementation of an energy programme
- Catalysed the improved participation, advancement and profile of women in the energy industry

COMPLETING THE ENTRY FORM

Please complete the entry form and attach a one-page summary of the entrant's project. The one-page summary should contain the following information:

ENTRANT

Who is the individual being entered (name, age, position, contact details). Contextualise her position and role in terms of the entry (qualifications, experience, skills).

ACHIEVEMENT

Describe her contribution to the energy sector, the community or the larger society. Focus on her leadership role, her knowledge and transfer of this knowledge, clearly indicating what makes her contribution unique and different.

RESULTS

Discuss the impact of her contribution, indicating the impact of her work, the benefits and its future potential.

The panel of judges will consider these summaries in the first round of judging. The entrants of those projects deemed to be of a high calibre will be invited to make detailed presentations at a second judging session. These presentations should then address all the above judging criteria.

The panel of judges and the organisers of the *eta* Awards undertake to handle all entries in the strictest of confidence and not to disclose any information on entries to any other party. However, it is hoped that the winners in each category will be willing to share general information about their design or programme – especially the results they achieved and the benefits they derived – with others in an effort to catalyse greater energy efficiency in South Africa.

TURNING IDEAS INTO ENERGY

women in communities CATEGORY

This category acknowledges and rewards women who have played a major role in promoting energy efficiency in communities.

Your project or programme could win you R30 000 or R5 000 as a runner-up.

WHO CAN ENTER?

Entries are invited from or on behalf of women who have led sustainable energy or energy efficiency programmes in their communities during the past 1-2 years.

JUDGING CRITERIA

We're looking for women who have:

- Achieved a demonstrable impact in their community in terms of sustainable energy or energy efficiency
- Spearheaded a project with potential for replication in other communities
- Initiated and directed a project with a demonstrable impact
- Improved awareness of sustainable energy or energy efficiency
- Shown outstanding achievement in the development and implementation of a sustainable energy or an energy efficiency programme

COMPLETING THE ENTRY FORM

Please complete the entry form and attach a one-page summary of the entrant's project. The one-page summary should contain the following information:

ENTRANT

Who is the individual being entered (name, age, position, contact details). Contextualise her position and role in terms of the entry (qualifications, experience, skills).

ACHIEVEMENT

Describe her contribution to the community or the larger society. Focus on her leadership role, her knowledge and transfer of this knowledge, clearly indicating what makes her contribution unique and different.

TURNING IDEAS INTO ENERGY

young designers CATEGORY

This category acknowledges and rewards school-going learners for the creation, design or development of innovative, efficient end-use energy applications.

If you or your team has a radical concept that will result in a better or more efficient and effective way to use energy and in so doing brings about new and vibrant opportunities, we want to see it. Your idea could win you R30 000 each or R5 000 as a runner-up.

WHO CAN ENTER?

Your entry can be any creative idea, programme, design or prototype that looks at the efficient use of energy and not the generation or supply of energy. Entries should not comprise of reports or evaluation studies that review the use of existing products or processes.

JUDGING CRITERIA

To qualify, meet as many as possible of the requirements listed below – Demonstrate a sound understanding of the principles of the effective use of energy:

- Innovative processes, programmes or products that improve energy efficiency
- Practical measurement and application of the idea, design or prototype, including a workable model
- A positive environmental impact

COMPLETING THE ENTRY FORM

Please complete the entry form and attach a one-page summary of the programme, system, design or product that you have designed or a very creative idea that will promote energy efficiency. The summary may contain basic illustrations or graphics. All entry material should also be legible when photocopied.

The panel of judges will consider these summaries in the first round of judging. The entrants of those projects deemed to be of a high calibre will be invited to make detailed presentations at a second judging session. These presentations should then address all the above judging criteria.

ENTRY FORM - CLOSING DATE: 14 AUGUST 2009
